

Communication Systems
Dr.Hüseyin Üvet
2013-2014 Spring Term Project

Please prepare answers for the following questions.

1) What is the main objective of the project ? Please describe deeply the goals you would like to achieve.
2) Give specific details of your design with keypoints.
3) Support your design criteria with mathematical background.
4) Give flow charts of your algorithm you would like to apply.
5) Interpret outputs of your results with graphs, charts and tables.
6) If you've got any structure, code <i>etc.</i> from a source, like a webpage or database already exist on internet, indicate the source as reference.

Be careful about each study has to be done originally, results will be evaluated considering this criteria.

Good Luck..
